Saksham Agarwal Full Stack Engineer

Bangalore +91 8869070495 sakshamag.work@gmail.com LinkedIn GitHub Portfolio

Full Stack Engineer with **4.5+ years of experience** designing, developing, and delivering **scalable web and mobile applications** using **React.js, Next.js, Node.js, Express.js, Java, SpringBoot and modern JavaScript technologies**.

Skills

- **Programming Languages — JavaScript, TypeScript**, **Java**, Python, HTML, CSS
- **Frontend — React.js, Next.js, Redux, Tailwind CSS,** React Query, Bootstrap, Angular, jQuery
- **Backend — Node.js, Express.js, REST APIs**, **Spring Boot**, GraphQL
- **Mobile — React Native**, Ionic React, Capacitor, Flutter
- **Databases — MongoDB**, MySQL, PostgreSQL
- **Cloud & DevOps — AWS**, **Docker**, CI/CD, Git/GitHub
- **AI — AI Agents**, LangChain, LangGraph, Retrieval-Augmented Generation (RAG)

Work Experience

Software Engineer, Codilar Technologies Jun 2025 – Present | Bangalore, India

- Developed and optimized **enterprise-scale eCommerce solutions** serving **100K+ daily active users**, improving customer experience across **high-traffic purchase journeys**.
- **Owned** business-critical **commerce workflows** including **cart, checkout**, **recommendation widgets**, and customer interactions using **Akinon** Commerce Platform.
- **Architected** reusable React.js and Next.js components with **SSR-friendly** rendering patterns, **reducing implementation duplication** and improving maintainability, SEO, and **page performance.**
- **Collaborated** with **product, backend, QA, and international stakeholders** within **Agile** delivery cycles to ship reliable production releases and maintain **high engineering standards**.
- Leveraged **AI-assisted development tools** for implementation, debugging, code refactoring, and **productivity** improvements while maintaining **code quality**.
- **Mentored junior developers** through reviews, pairing, and architecture guidance, improving consistency across the codebase.
- Built a **Core Product Dashboard** (plug-and-play scripts with minimal configuration) capable of **collecting performance metrics** and **integrating recommendation capabilities**, designed to integrate across multiple stacks (e.g., JavaScript, Django, etc).
- **Contributed** to the development of an **AI-powered conversational commerce chatbot**, integrating **end-to-end shopping capabilities** across **product discovery, cart, and checkout journeys.**

Frontend Developer, Ultimez Technology Dec 2024 – May 2025 | Remote, India

- Developed scalable web experiences using **React.js** and **Next.js**, and built cross-platform mobile app features using **Ionic React + Capacitor**.
- Improved UX and responsiveness by identifying performance bottlenecks and systematically reducing UI lag and heavy renders.
- Implemented optimizations such as **code splitting, caching strategies, lazy loading, tree shaking**, and component-level refactors, achieving **~30% faster page load speed** and **~40% reduction in unnecessary re-renders**.
- Eliminated ~**35%** unused/low-value code and simplified flows to **reduce complexity**, **increase maintainability**, and improve long-term development velocity.
- Worked closely with design, QA, backend teams and stakeholders to deliver **consistent UI behavior** across devices and ensure **smooth release cycles.**

Full Stack Developer, Appringer LLP Dec 2023 – Nov 2024 | Remote, India

- **Led frontend development** for **multiple client applications**, driving delivery predictability and **improving sprint execution** through strong collaboration and **ownership**.

- Delivered **scalable web and mobile applications** using React.js, React Native, Node.js, and modern UI architectures.
- Built **reusable component libraries** and **frontend architecture** that improved development speed and consistency across projects.
- **Improved page performance** by approximately **35%** through **rendering optimizations**, reusable **design patterns,** and efficient state management.
- Participated in **technical planning**, sprint execution, and **engineering discussions** to align **technical solutions** with business goals.

Full Stack Developer, Mag Cloud Solutions Jun 2023 – Dec 2023 | Agra, India
- Developed **full-stack applications** using the **MERN stack,** delivering end-to-end features across frontend and backend.
- Built cross-platform mobile applications using **Flutter** and shipped production builds to the **Google Play Store**.
- **Worked independently** on end-to-end delivery for **multiple projects**, including development, iteration, testing, and release readiness.

Full Stack Developer, Madrid Software Jun 2022 – May 2023 | Delhi, India
- **Developed and maintained** MERN-stack applications, implementing responsive interfaces, REST API integrations, authentication, and **database-backed business workflows**.
- Worked in **high-ownership** mode across UI, API integration, and database-backed functionality to meet **business timelines.**

Projects

EMR / HMS , Electronic Medical Records / Hospital Management System
- Built key UI modules and workflows with **React.js** for operational and clinical use cases.
- Worked across teams to ship reliable, **role-oriented interfaces** and improve usability under real-world constraints.

Coinpedia , Crypto News / Events / Information Platform
- Built responsive **web and hybrid mobile experiences** with a strong focus on performance and user experience.
- Improved application speed by implementing l**azy loading, caching, tree shaking, and code splitting.**
- Reduced unnecessary rendering and simplified **component architecture for long-term scalability.**

TrueTalent , End-to-End Job Board Platform
- **Developed recruitment workflows** for recruiters and job seekers.
- Built reusable **frontend architecture** supporting multiple business modules while **improving maintainability** and **user experience.**

Propagator , Social Platform (Free-Speech)
- **Developed core UI and product flows** using modern frontend tooling and patterns.
- Prioritized **performance and user experience** through iterative refinement and component reuse.
- Built & managed a **queue-based video transcoding workflow** using **RabbitMQ** that generates multiple resolution variants, **improving playback reliability** across different network conditions.

Core Product Dashboard, Metrics + Recommendations (Plug-and-Play)
- Built a reusable dashboard solution for **performance metrics collection** and **recommendation system** enablement.
- Designed for minimal configuration and compatibility across multiple stacks (e.g., **JavaScript**, **Django**), enabling adoption by multiple brands.
- Collaborated on product decisions and implementation details to balance flexibility, ease of integration, and maintainability.

Education

Bachelor of Vocation - Internet of Things (IoT), Jul 2019 – May 2022 | Agra, India
Dayalbagh Educational Institute
CGPA - 8/10
